

Winds Will Tilt Easter Hats, Rain Pelt Paraders

But Tender Hens Will Be Ready in Homes For Feast Day Celebration After Joyful Services in Churches — Candy, Flowers, Maybe Brook Trout

Auburn streets and stores hummed with activity today as eleventh hour Easter shopping crowds bought gifts, flowers, candy and food for the feast just ahead. Hundreds of Auburnians, it was apparent, planned to end the Lenten fast with a feast that will be temporal as well as spiritual.

Easter finery for the feminine Auburnians and their neighbors from surrounding towns was topped off today by many buyers with last minute purchases. As for the masculine element, they were not overlooked. To what extent mild and her escort will be able to wear their new apparel on Easter depends largely on the mood fickle April may be in.

Many merchants report Easter-tide sales higher than some previous years and all seem agreed that business has been good despite the unpropitious early April weather.

Today the chief demand was for flowers and candy and stocks on all orders were rapidly thinned. Mothers, aunts, girlfriends, boy friends, grandmothers and all the little children will unwrap gay Easter packages, and there will be happy family parties, following visits to the churches, before mother or maid announces the tender ham ready for the feast day gorging with all taboos of Lent cast aside.

Clouds and Showers
But what about the weather for Easter?
The outlook is not too bright—wind, clouds, showers. But on the favorable side the temperature will be climbing.
Trading was lively today in passable weather—dark but not too cold.
The temperature dropped below freezing, down to 27, last night while the moon was shining and the stars sparkling, and climbed to 40 by midday.
In addition to glowing Easter raiment Sunday nature also will offer a colorful display—crocuses, pansies, hyacinths, some snowdrops, crocuses, and of course the showy snow drops and cheerful little flowers of the wildwood.
Out for Brookies
Brook trout fishermen were abroad by the hundreds today to usher in another season and the weather conditions were to their liking despite the absence of sun. They found their favorite streams fairly high, with considerable fast water. A few weeks back the brooks were rather low.

Gets a Laker
Bill Widener of 49 Perry Street caught a three and one-half pound lake trout while fishing last night in Skaneateles Lake. The fish was on display today at Bryn's Sporting Goods Store.

Styles in Corn Varieties Change; Scientists Urge Growing Hybrids

Like styles in automobiles and women's hats, styles in corn varieties go out-of-date too.

And scientists at the Cornell University Agricultural Experiment Station have good reasons for putting that label on Westchester Sweetcorn, an open-pollinated variety of silage corn. "No longer practical as a silage crop, Sweetcorn came out a poor second to adapted hybrids in 41 trials in 14 counties," Dr. R. G. Wiggins of the department of plant breeding reported. The trials were held during the past four years in Allegany, Chemung, Chautauque, Delaware, Steuben, Sullivan, Warren, Yates, Broome, Cayuga, Cortland, Montgomery, Saratoga, Schoharie, and Wyoming Counties.

The farmer who still grows Sweetcorn adds to his work. He must grow up to 10 per cent more acreage, and handle, provide storage for, and feed out of the silage something over one-fifth more green material for the same amount of feed value he would get from the adapted hybrids," he said.

Satisfaction
"About the only compensations the farmer receives are the satisfaction in growing larger plants, a heavy tonnage per acre, and slightly lower seed costs."

"On the other hand, the grower who chooses an adapted hybrid and harvests at the hard dough (dented) stage is repaid with as great or greater total digestible nutrients an acre, less bulk and weight to handle, easier harvesting, reduced storage requirements, a higher quality silage, and lower feed bill."

In the less favorable areas for corn production such as the higher elevations in southern New York and the low-lying cool north country, Westbranch Sweetcorns failed to reach a satisfactory stage of maturity for silage. Only 21 per cent of it was dry matter and only 15 per cent of that was grain. In contrast, Dr. Wiggins stated that the trials of all hybrids in the same trials showed 25 per cent total dry matter. Close to a third of it was grain.

Sweetcorns proved only slightly better in the trials in the more favorable corn-growing areas. These included a large part of upper New York State. Only 25 per cent of the total dry matter in Sweetcorns in these tests was grain as compared to an average of 36 per cent for the adapted hybrids.

Four Tons More
Even though the open-pollinated variety yielded almost four tons more green weight per acre in the early corn group, the digestible nutrients were approximately the same. In the medium maturity trials, Sweetcorns with 2.3 tons more green weight averaged eight per cent less total digestible nutrients an acre.

Here's the figure that Dr. Wiggins said really counts. "On the average the hybrids produced 21 per cent more feeding value for a unit of harvested crop than did Sweetcorns."

As he summed it up: "The cow has to eat 40 pounds of Sweetcorn stalks to get the same amount of feeding value that 32 pounds of the adapted hybrids would give when the two are produced under exactly the same conditions and harvested when the adapted hybrid is in the hard dough stage."

PERSONNEL MEN MEET

Several Auburn personnel directors will attend an upstate conference May 1, at Hotel Syracuse in Syracuse.

"Leadership in Human Relations—the Challenge to Management" will be the conference theme. The closing dinner will be addressed by Emile F. duPont, director of employee relations at E. I. duPont de Nemours & Co.

Air Force Funds Dispute

Washington, April 12—(AP)—The Air Force said today it was trying to settle a funds dispute which has kept the Air Force's units at an unfinished base in Chateaufort, France.

The dispute between the Air Force and the Mutual Security Agency, is over who is going to pay for building the big supply base. It was established last summer to store equipment shipped from this country for use by nations in the military assistance program.

Air Attack on Red Bases

Tokyo, April 12—(AP)—America's top air commander in the Far East said today his forces could attack Communist bases in Manchuria at least once but probably could not sustain such attacks.

Lt. Gen. Otto P. Weyland said his Far East Air Force (FEAF) would need reinforcements if the Korean war were carried across the border to Red bases as has often been advocated.

Queen Entertained

Sea Island, Ga., April 12—(AP)—Queen Juliana of the Netherlands had a delightful experience last night enjoying typical southern hospitality at an oyster roast on an old pier plantation in what was described as a "Game With the Wind" setting.

A full moon glowed over great oak trees bedecked with Spanish moss at the Altemaha plantation owned by Alfred Jones, chairman of the board of the Claret Hotel.

Nudeist Colony Visitors

Victoria, B. C.—(AP)—For \$1 a visitor will be able to take a conducted tour of Vancouver's nudeist colony this summer.

The society has the objective of providing "a private and secluded location for recreation and the practice of sunbathing." Under the title of Van Tan Club, the society was recently incorporated, the first such organization in British Columbia.

The published rates say a visitor may tour the camp for \$1 as long as he is accompanied by a member "who will be responsible for his conduct." A camp hostess will welcome visitors and make introductions. No photographs may be taken without consent of the subject. Membership fees are \$13 for single men, \$6 for single women.

Refugees Get U. S. Aid

Hanoi, Indo-China—(AP)—The refugees streaming into Hanoi from lands occupied by the Communist Vietnamese look for aid and American aid here.

They're getting direct relief—such as food, blankets, clothing and medicines from the American Mutual Security Administration.

Its public health branch handles the medicines and medical treatment for the needy. The direct relief and rehabilitation unit is directed by Herman Joe Holliday, 26, of Indianapolis, onetime Tuskegee University football star.

The USA estimates it has aided 300,000 people in North Vietnam since the American aid program was started less than two years ago.

Smart Ducks

Edmonton, Alta.—(AP)—Two wild ducks have selected the North Saskatchewan River as a winter location instead of making the trip south. The ducks were spotted in open waters warmed by an outlet at the city power plant.

LAW'S LONG ARM TAGS VAN ORMAN

Lively Court Ordeal No Novelty — But Scipio Man Is Allowed Looney

Perry Van Orman, of Scipio, formerly of R. D. 1, Moravia, was taken before two peace justices today on two charges. He has until Tuesday to make restitution on one charge or a fine of \$35 and a six months jail sentence goes into effect. On the other charge, Van Orman was placed on probation.

In both proceedings Van Orman was taken into custody by State Trooper James Kennedy, of the Auburn sub-station who located him in Scipio after working on the case several days.

Van Orman had been arrested on a petit larceny charge last January in connection with theft of farm machinery and junk from Austin Rowe of Niles, a former employer, troopers' records show. At that time, Van Orman was fined \$25 and given 30 days in jail, also directed to make \$25 restitution by Peace Justice West of Niles. Sentence was suspended. But Van Orman, according to the troopers, has not made full restitution.

The long arm of the law again reached out for Van Orman when Mrs. W. Reed of Scipioville, a stakeholder, complained to the troopers that Van Orman had given her in exchange for merchandise a \$5 check which "bounced."

This morning Van Orman was taken before Peace Justice Charles Carter of Scipio on a petit larceny charge in connection with the check deal and given a sentence of \$25 fine and six months in jail. Van Orman was given until Tuesday to make restitution, otherwise the sentence goes into effect.

Van Orman was also before Judge West in connection with the former petit larceny charge. Judge West placed him on probation with the Cayuga County Probation Department.

Port Byron

Miss Mercedes Casado, Dean Mullavey and Eric Huggins, cadet teachers and Syracuse University School of Education students, are at the Port Byron Central School for a three-week period of practice teaching. Dean Mullavey, art cadet, is working under Mrs. Regina Gates, art teacher at the school. Miss Casado is working with Miss Doris Kennedy, vocal music instructor, and Mr. Huggins, a Syracuse University basketball star, is working under Dana West, boys' physical education instructor at the school.

Forty acres of land in Mills Road, west of the village, have been dedicated to special services conducted by Rev. Garnet O. Wright, pastor of the Port Byron Methodist Church, as a new Lord's Acre project. The Young Adult Class of the church is responsible, under the chairmanship of Robert Dawson, assisted by Orville Mills. The land was donated by Robert Marland. Twenty to 40 acres will be planted to corn crops, all work on the entire project being donated by members. Seed and fertilizer will be purchased through contributions. All funds earned on the Lord's Acre will be used for local church improvements.

The annual Egypt Fryers fish dinner at the Port Byron Methodist Church will be served in the church parlors Friday evening, April 12, from 5 p. m. until all are served. Walter L. Kerns is in charge of the kitchen and ticket sales.

Rudolph Schaefer, president of the Port Byron Chamber of Commerce, announced today that the April meeting of the Chamber has been cancelled. The next meeting of the local Chamber will be announced.

Mr. and Mrs. W. Parnell Moroney were guests during the week at the home of his mother, Mrs. Maroney, in Main Street. Mr. Moroney, a civil engineer, has been for some time engaged in work on a government airport project in Maryland, and after a short vacation will start work in Olman.

To Vote on GE Terms

Elmira, N. Y., April 12—(AP)—About 700 striking production and maintenance workers at the Elmira works of General Electric will vote tomorrow on terms of a company-union agreement.

The company and Local 310, United Electrical Workers (Ind) reported they came to terms last night on a dispute over piece-work pay.

Leland Austin, president of the local, said the terms would not be revealed before tomorrow's meeting. The company declined also to reveal the terms.

GRAIN MARKET

	Wheat	Opes.	High	Low	Close

If no fertilizer were used on farm crops, production would be at least 25 per cent lower.

CORNELL URGES CARE FOR TREES

Specialists Advise Removal Of Dead Elm Wood To Halt Disease

Attention to elm trees early in the spring is urged by Cornell University specialists. Early spring care of your favorite elm will provide the best protection from Dutch elm disease.

This disease causes a withering, browning, or "flagging" of the leaves either on parts or all over the tree. This takes place soon after the leaves appear and eventually kills the tree. It is primarily spread from tree to tree by small bark beetles, and their control will arrest the spread of the disease.

Recently killed or dying elm wood is the favored home of the beetles to overwinter and raise their families. In the spring, however, the beetles leave the wood in which they breed to feed on healthy elm trees. It is largely during this spring feeding that they transmit the disease, for many of the beetles carry the spores of the fungus responsible for the disease on their bodies.

The Cornell specialists recommend that all recently killed or dying elm wood be removed within a radius of 700 feet from the elm tree you wish to protect. Burn this wood or remove and burn the bark by April 15. Since the beetles do not usually fly more than 700 feet, the careful destruction of the breeding sites within that distance affords your tree the best protection.

Dormant spraying before the trees leaf out with a concentrated DDT spray has been found of value, but is much more expensive than a thorough sanitation program.

It is good to plant trees on Arbor Day, but much more satisfying to protect the ones you have, say the specialists. More information on the control of the Dutch Elm Disease may be had from the Department of Entomology, Cornell University, Ithaca, N. Y.

Geologists have found fossil remains of jellyfish which were deposited in the mud of ancient Cambrian seas millions of years ago.

Ancient Bronze Scrolls Discovered Near Dead Sea Have Hebrew Writing

They Will Be Read in Paris or London, He Said

Ithaca, N. Y. — (UP)— Announcement of the discovery of two ancient bronze scrolls on the shores of the Dead Sea had archaeologists crossing their fingers today.

The scrolls—bearing Hebrew writing and believed to date back before Christ—are tightly rolled, and special processes will have to be used to unroll them.

Bathed in Chemicals
Prof. A. Henry Detweiler, a member of the American schools of oriental research who announced the discovery last night, said the scrolls probably will be bathed in chemicals to remove corrosion. Then if the metal has retained enough spring, the scrolls will be inched open and their ancient contents read.

But the professor said if the metal is too fragile, months may pass before scientists decide how to do the job.

Detweiler said the fact the scrolls are made of metal instead of papyrus or leather indicates they contain something "most important."

A field archeologist and Cornell University professor of arid and desert history, Detweiler said he never before had seen or heard of similar scrolls, he called them "unique."

The scrolls were discovered by an expedition led by Dr. William L. Reed of Texas Christian University, American schools director, and Pere Roland Deraux of the Ecole Biblique et Archaeologique Francaise.

In a letter to Detweiler, Reed said the scrolls were found in ancient caves on the Dead Sea's northwest shore near Jerico.

He said the scrolls together measure 2.40 meters (nearly 8 ft.) and are covered with lengthy texts written in block Hebrew letters.

Reed said the expedition to the caves was hastily organized when it was learned that tribesmen had found manuscripts there during the last few months.

Book of Isaiah
Detweiler said early Biblical manuscripts including a Hebrew text of the Book of Isaiah were found in the same caves in Orzim.

One result of the 1948 findings cast a shadow over efforts to unroll the bronze scrolls. Detweiler said a leather manuscript found in 1948 still hasn't been unrolled because archeologists don't agree on a safe way to do it.

But the professor was optimistic about the scrolls. He said archeologists know more about restoring metal. The work prob-

ably will be done in Paris or London, he said.

Reed's expedition was sponsored by the American schools, the Ecole Biblique and the Palestine Archeological Museum.

Stock Trading Slow
New York, April 12—(AP)—The twin handicaps of major labor disputes and a holiday week-end proved an effective brake on Stock Market progress in today's short session.

Prices barely budged from previous levels and changes were measured mostly in a few cents a share.

Some of the radio and television stocks broke out of this pattern in a late flurry of demand.

Stocks in the steel companies whose plants have been seized by the federal government to avert a strike were largely neglected. A few sagged slightly, as negotiations in the dispute were in recess.

IN THE SERVICE

Cpl. Donald R. Murphy, son of Mr. and Mrs. Edward E. Murphy of Aurora, was recently assigned to the 26th Infantry Regiment in Bamberg, Germany, as a clerk in Headquarters and Headquarters Company. A graduate of Sherwood Central High School, he was employed as a carpenter prior to being inducted into the Army in March, 1951. He is an active participant in football, basketball, softball, and baseball, when not engaged in his military duties. The regiment is part of the famous Fighting First Division.

Listed among the 1,406 Korean combatants the arrived Friday at San Francisco was Cpl. Harold L. Colvin of 15 Florence St.

Sgt. Anthony Franceschelli of 13 Madison Ave. was aboard the Navy transport Howard Wood that arrived at San Francisco yesterday with 1,394 Army combat veterans from Korea. Sgt. Franceschelli has been in Korea for 10 months with an artillery unit. He graduated from West High School and joined the service a year ago last October.

Cut In Garage
Alex Elmquist, 24, of RD 5, was treated at 11:15 a. m. today at City Hospital for a puncture wound on the right index finger. He was injured at the Ely and Landon garage and drove to the hospital himself. He was discharged after being treated.

Elections Postponed
Cairo, Egypt, April 12—(UP)—The Egyptian national elections which were to have been held May 1 have been postponed Interior Minister Mortada Maraghy announced today.

Maraghy said a decree postponing the elections has been signed by King Farouk. A new election date will be fixed under an amendment to the election law, the minister said.

Maraghy's announcement was the first official indication Premier Neguib Hilaly's government planned to change the electoral laws.

Somewhere in Sierra Madre Mountains, Luzon, Philippines, April 12.—(UP)— Defense Secretary Ramon Maguayay said today that captured American Hawk Leader William Pomeroy would be tried by Philippine Court for crimes against the state including multiple murder and arson.

It was understood United States Ambassador Raymond A. Spruance has been advised of this and has not objected.

If found guilty, Pomeroy could be executed. He cannot be tried for treason or rebellion since he is a citizen of another country.

GOOD FRIDAY SAMARITAN ACT

Red Star Drivers Dig Down To Solve Grave Problem Of Mother And Child

Stranded without money Friday night in Auburn when she missed meeting her truck-driver husband, a Buffalo woman and her little daughter were given a bus ticket home after a group of Red Star drivers here took up a collection.

The woman and her small daughter reported at 9 p. m. to police headquarters that they were to meet the husband and father that afternoon. He was driving from Syracuse through to Buffalo.

The stranded pair had missed connections somewhere along the line and had only money enough to make a phone call to Buffalo. Because of the Western Union strike they could not have money sent here.

Officer Clair Stanton did considerable leg work trying to locate a ride for the woman and child. He contacted truck lines to see if they might possibly have trucks leaving for Buffalo.

Finally at 11:10 p. m. when all appeared lost, Leo Ryan of the Red Star Co. called Capt. Robert J. Riley and reported Red Star drivers had taken up a collection.

At 1:20 a. m. the woman and daughter were placed on a Greyhound bus and headed for home, no doubt carrying soft spots in their hearts for Auburn and, in particular, its police force and Red Star Express Lines.

American Faces Trial in Manila

Somewhere in Sierra Madre Mountains, Luzon, Philippines, April 12.—(UP)— Defense Secretary Ramon Maguayay said today that captured American Hawk Leader William Pomeroy would be tried by Philippine Court for crimes against the state including multiple murder and arson.

It was understood United States Ambassador Raymond A. Spruance has been advised of this and has not objected.

If found guilty, Pomeroy could be executed. He cannot be tried for treason or rebellion since he is a citizen of another country.

Advertisers Choose Newspapers 2 to 1 OVER ANY OTHER MEDIUM!

Medium	% of Total
NEWSPAPERS*	34.0%
DIRECT MAIL	14.0%
ALL RADIO	10.5%
MAGAZINES	8.6%
ALL TV	7.4%

It takes a lot of confidence and all kinds of people to spend 2 1/2 billion dollars on advertising.

It takes everybody from big VPs to housewives with rooms to rent. It takes chain-store executives and neighborhood merchants.

It takes local business people—those who spend only their own money for ads, and those who also spend the important money contributed by manufacturers.

But most of all it takes an advertising medium that can do the job: NEWSPAPERS.

If you're a retailer or wholesaler, demand newspaper advertising before you place an order.

If you're a salesman or district manager, ask your management for newspaper advertising to move out the products you sell.

And if you're a manufacturer, remember this: IN 1951 ONE-THIRD OF ALL U. S. ADVERTISING DOLLARS WENT INTO NEWSPAPERS.

Miscellaneous media: 25.5% brings total to new high — 6 1/2 billion dollars. Figures include production costs. *Daily only (weekdays and Sundays). Source: Preliminary estimates for 1951 published by *Printers' Ink*, Jan. 11, 1952.

This message prepared by BUREAU OF ADVERTISING, American Newspaper Publishers Association, and published in the interests of better understanding of newspapers by THE CITIZEN-ADVERTISER.

The newspaper is always "first with the most"
